(first entry) Bishop PD; \$

Novel isolated mammalian cystatin-8 polypeptide useful for promoting spermatogenesis, and inhibiting cancer procoagulant protein which leads to inhibition of thrombotic events associated with cancer.

WPI; 2002-383044/41.

Claim 2; Page 99; 100pp; English.

The invention describes an isolated mammalian cystatin-8 (Zcys8) polypeptide (I). (I) is useful for: inhibiting cancer procoagulant protein in an individual and thus inhibiting the thrombotic events associated with cancer; promoting spermatogenesis, modulating seminal fluid viscosity, enhancing viability of cryopreserved sperm, sperm motility and fertilisation; and as antigenic peptides to generate antibodies. Zcys8 is useful as research reagent for characterising sites of interaction between Zcys8 and its receptor. Zcys8 is useful in enhancing fertilisation during assisted reproduction in humans and in animals. Anti-(I) antibodies are useful to screen biological samples like blood, urine, saliva, tissue biopsy and autopsy material in vitro for the presence of Zcys8. The antibodies are also useful to isolate large

ID 79866
ID The invention describes an isolated mammalian cystatin-8 (Zcys8)

CD polypeptide (I). (I) is useful for: inhibiting cancer procoagulant protein in an individual and thus inhibiting the thrombotic events associated with cancer; promoting spermatogenesis, modulating seminal fluid viscosity, enhancing viability of cryopreserved sperm, sperm contility and fertilisation; and as antigenic peptides to generate antibodies. Zcys8 is useful as research reagent for characterising sites of interaction between Zcys8 and its receptor. Zcys8 is useful in cenhancing fertilisation during assisted reproduction in humans and in C enhancing fertilisation during assisted reproduction in humans and in C enhancing fertilisation during assisted reproduction in humans and in C enhancing fertilisation during assisted reproduction in bundans and in the control of crys8. The antibodies are useful to acreen biological samples like blood, urine, saliva, tissue biopsy and autopsy material in vitro for the presence of Zcys8 protein and DNA sequences that encode Zcys8 genes.

The polymucleotide encoding (I) is useful to detect and to localise the expression of a Zcys8 gene in a biological sample and Zcys8 Query Match Best Local S Matches 48 quantities of Zcys8 protein and DNA sequences that encode Zcys8 genes. The polynucleotide encoding (I) is useful to detect and to localise the expression of a Zcys8 gene in a biological sample and Zcys8 colligonucleotide probes are useful for in vivo diagnosis. The polynucleotide encoding (I) is useful in determining whether a subject's chromosomes contain a mutation in the Zcys8 gene like aneuploidy, gene copy number changes, insertions, deletions, restriction site changes and rearrangements and genetic alterations that inactivate the Zcys8 gene. Novel isolated mammalian cystatin-8 polypeptide useful for promoting spermatogenesis, and inhibiting cancer procoagulant protein which leads to inhibition of thrombotic events associated with cancer. CC CONT
CC CON The invention describes an isolated mammalian cystatin-8 (2cys8)

CC polypeptide (I) (I) is useful for: inhibiting cancer procesulant

CC protein in an individual and thus inhibiting the thrombotic events

CC associated with cancer; promoting spermatogenesis, modulating seminal

CC fluid viscosity, enhancing viability of cryopreserved sperm, sperm

CC motility and fertilisation; and as antigenic peptides to generate

CC antibodies. Zoys8 is useful as research reagent for characterising sites

CC of interaction between Zoys8 and its receptor. Zoys8 is useful in

CC enhancing fertilisation during assisted reproduction in humans and in

CC enhancing fertilisation during assisted reproduction in humans and in

CC enhancing fertilisation during assisted reproduction in humans and in

CC entitles. Anti-(I) antibodies are useful to screen biological samples like

CC polymucleotide protein and DNA sequences that encode Zoys8 genes.

CC The polymucleotide encoding (I) is useful to detect and to localise the

CC polymucleotide probes are useful for in vivo diagnosis. The

CC chromosomes contain a mutation in the Zoys8 gene like aneuploidy, gene Novel isolated mammalian cystatin-8 polypeptide useful for promoting spermatogenesis, and inhibiting cancer procoagulant protein which leads to inhibition of thrombotic events associated with cancer. Claim 2; Page 98; 100pp; English.

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    ð
                                                                                                                 The invention describes an isolated mammalian cystatin-8 (Zcys8)

CC polypeptide (I). (I) is useful for: inhibiting cancer procoagulant

CC protein in an individual and thus inhibiting the thrombotic events

CC associated with cancer; promoting spermatogenesis, modulating seminal

CC fluid viscosity, enhancing viability of cryopreserved sperm, sperm

CC motility and fertilisation; and as antigenic peptides to generate

CC antibodies. Zcys8 is useful as research reagent for characterising sites

CC of interaction between Zcys8 and its receptor. Zcys8 is useful in

CC enhancing fertilisation during assisted reproduction in humans and in

CC enimals. Anti-(I) antibodies are useful to screen biological samples like

CC presence of Zcys8. The antibodies are also useful to isolate large

CC quantities of Zcys8 protein and DNA sequences that encode Zcys8 genes.

CC oligonucleotide encoding (I) is useful to detect and to localise the

CC expression of a Zcys8 gene in a biological sample and Zcys8 genes.

CC oligonucleotide probes are useful for in vivo diagnosis. The

CC oplynucleotide encoding (I) is useful to detect and zcys8 gene

CC chromosomes contain a mutation in the Zcys8 gene like aneuploidy, gene

CC chromosomes contain a mutation in the Zcys8 gene like aneuploidy, gene

CC chromosomes contain a mutation in the Zcys8 gene like aneuploidy, gene

CC rearrangements and genetic alterations that inactivate the Zcys8 gene.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               SXG
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Matches
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               Novel isolated mammalian cystatin-8 polypeptide useful for promoting spermatogenesis, and inhibiting cancer procoagulant protein which leads to inhibition of thrombotic events associated with cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   This sequence represents an antigenic peptide of human cystatin-8 (Zcys8)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     01-SEP-2000; 2000US-0230230P

                                                                                                                           animals. Anti-(I) antibodies are useful to screen biological samples like blood, urine, saliva, tissue biopsy and autopsy material in vitro for the presence of Zcys8. The antibodies are also useful to isolate large quantities of Zcys8 protein and DNA sequences that encode Zcys8 genes. The polynucleotide encoding (I) is useful to detect and to localise the expression of a Zcys8 gene in a biological sample and Zcys8 oligonucleotide probes are useful for in vivo diagnosis. The polynucleotide encoding (I) is useful in determining whether a subject's chromosomes contain a mutation in the Zcys8 gene like aneuploidy, gene copy number changes, insertions, deletions, restriction site changes and rearrangements and genetic alterations that inactivate the Zcys8 gene.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      associated with cancer; promoting spermatogenesis, modulating seminal fluid viscosity, enhancing viability of cryopreserved sperm, sperm motility and fertilisation; and as antibodies. Zcys8 is useful as research reagent for characterising sites of interaction between Zcys8 and its receptor. Zcys8 is useful in enhancing fertilisation during assisted reproduction in humans and in
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Novel isolated mammalian cystatin-8 polypeptide useful for promoting spermatogenesis, and inhibiting cancer procoagulant protein which leads to inhibition of thrombotic events associated with cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Cystatin-8; Zcys8; cancer; procoagulant protein; thrombosis; spermatogenesis; seminal fluid viscosity; cryopreserved sper sperm motility; fertilisation; antigenic fragment.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      polypeptide

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                    S
                                                                                                      contility and fertilisation; and as antigenic peptides to generate motility and fertilisation; and as antigenic peptides to generate antibodies. Zcys8 is useful as research reagent for characterising sites of interaction between Zcys8 and its receptor. Zcys8 is useful in cenhancing fertilisation during assisted reproduction in humans and in animals. Anti-(I) antibodies are useful to screen biological samples like blood, urine, saliva, tissue biopsy and autopsy material in vitro for the presence of Zcys8. The antibodies are also useful to isolate large quantities of Zcys8 protein and DNA sequences that encode Zcys8 genes. The polynucleotide encoding (I) is useful to detect and to localise the expression of a Zcys8 gene in a biological sample and Zcys8 cliponucleotide probes are useful for in vivo diagnosis. The polynucleotide probes are useful for in determining whether a subject's copy number changes, insertions, deletions, restriction site changes and rearrangements and genetic alterations that inactivate the Zcys8 gene.

This is the amino acid sequence of human cystatin-8 (Zcys8)

                                                                    Query Match
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   of interaction between Zcys8 and its receptor. Zcys8 is useful in enhancing fertilisation during assisted reproduction in humans and in animals. Anti-(I) antibodies are useful to screen biological samples like blood, urine, saliva, tissue biopsy and autopsy material in vitro for the presence of Zcys8. The antibodies are also useful to isolate large
                                                                                                                                                                                                                                                                                                            quantities of Zcys8 protein and DNA sequences that encode Zcys8 genes. The polynucleotide encoding (I) is useful to detect and to localise the expression of a Zcys8 gene in a biological sample and Zcys8 oligonucleotide probes are useful for in vivo diagnosis. The polynucleotide encoding (I) is useful in determining whether a subject's chromosomes contain a mutation in the Zcys8 gene like aneuploidy, gene
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                     associated with cancer; promoting spermatogenesis, modulating seminal fluid viscosity, enhancing viability of cryopreserved sperm, sperm motility and fertilisation; and as antigenic peptides to generate antibodies. Zcys8 is useful as research reagent for characterising sites
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      Novel isolated mammalian cystatin-8 polypeptide useful for promoting spermatogenesis, and inhibiting cancer procoagulant protein which leads to inhibition of thrombotic events associated with cancer.
                                                                                                                                      Sequence 33
                                                                                                                                                                                                   copy number changes, insertions, deletions, restriction site changes and rearrangements and genetic alterations that inactivate the Zcys8 gene. This sequence represents an antigenic peptide of human cystatin-8 (Zcys8)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           The invention describes an isolated mammalian cystatin-8 (Zcys8) polypeptide (I). (I) is useful for: inhibiting cancer procoagulant protein in an individual and thus inhibiting the thrombotic events
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                 Claim 2; Page 97; 100pp; English.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                WPI; 2002-383044/41.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                          01-SEP-2000; 2000US-0230230P

                                                                                                                                                                                                                                                                                                                                                                                                                                    of interaction between ZCy88 and its receptor. ZCy88 is useful in enhancing fertilisation during assisted reproduction in humans and in animals. Anti-(I) antibodies are useful to screen biological samples like blood, urine, saliva, tissue biopsy and autopsy material in vitro for the presence of Zcy88. The antibodies are also useful to isolate large quantities of Zcy88 protein and DNA sequences that encode Zcy88 genes. The polymucleotide encoding (I) is useful to detect and to localise the expression of a Zcy88 gene in a biological sample and Zcy88 oligonucleotide encoding (I) is useful to rearrangements and sustain in the Zcy88 gene like aneuploidy, gene copy number changes, insertions, deletions, restriction site changes and rearrangements and genetic alterations that inactivate the Zcy88 gene. This sequence represents an antigenic peptide of human cystatin-8 (Zcy88)
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  The invention describes an isolated mammalian cystatin-8 (Zcys8) polypeptide (I). (I) is useful for; inhibiting cancer processulant protein in an individual and thus inhibiting the thrombotic events associated with cancer; promoting spermatogenesis, modulating seminal fluid viscosity, enhancing viability of cryopreserved sperm, sperm motility and fertilisation; and as antigenic peptides to generate antibodies. Zys8 is useful as research reagent for characterising sites of the seminal fluid viscosity.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             Novel isolated mammalian cystatin-8 polypeptide useful for promoting spermatogenesis, and inhibiting cancer procoagulant protein which leads to inhibition of thrombotic events associated with cancer.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  Cystatin-8; Zcys8; cancer; procoagulant protein; thrombosis; spermatogenesis; seminal fluid viscosity; cryopreserved sperm; sperm motility; fertilisation; antigenic peptide.

                                                                                                                                                                                                                                                                                                                                                                                                                                                         reproductive tissues and secretions. Cystatin T sequence is useful for modulating spermatogenesis and studying, diagnosing and treating reproductive disorders. The present sequence is murine cystatin-related
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                               The present invention relates to cystatin T (also known as zcys3) DNA and protein sequences. Cystatin T is testis specific and is homologous to cystatin-related epididymal specific gene (CRES) and type 2 cystatins. Cystatins inhibit cysteine proteinases and are found with male
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Cystatin T polypeptides are useful for modulating spermatogenesis studying, diagnosing and treating reproductive disorders.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                Murine; cystatin T; zcys3; cystatin-related epididymal specific CRES; inhibitor; cysteine proteinase; male reproductive tissue; spermatogenesis; therapy; reproductive disorder.

The cystatin T polynucleotide is useful in gene therapy applications, where it is desired to increase or inhibit cystatin T activity. It is also useful for producing cystatin T polypeptide, as well as for detecting the expression of a cystatin T gene in a biological sample. The cystatin T is useful for modulating spermatogenesis, and may be used to study or modulate that function in in vitro or in vivo systems. In particular, it is also useful for enhancing sperm production, increasing the number of viable sperm in a sample, or enhancing

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             CC kit to perform the method, an array, a method for identifying an agent CC that increases or decreases the expression of the polynucleotide sequence Ct that is differentially expressed in neuronal tissue of a first animal CC subjected to pain, a method for identifying a compound which regulates CC the expressed in an animal subjected to pain, a method for identifying a compound that regulates the activity of one or more of the polynucleotides, a method for producing a pharmaceutical composition, a CC method for identifying a compound or small molecule that regulates the activity of an animal of one or more of the polypeptides given in the cc activity in an animal of one or more of the polypeptides given in the composition, a method for identifying a compound useful in treating CC pain and a pharmaceutical composition comprising the one or more CC specification, a method for identifying a compound useful in treating CC polypeptides or their antibodies. The polynucleotide or the compound that condulates its activity is useful for preparing a medicament for treating CC pain (e.g. spinal segmental nerve injury (Chung), chronic constriction conjury (CCI) and spared nerve injury (SNI) in an animal (e.g. spene CC the specification) which is differentially expressed during pain. Note: The sequence data for this patent did not form part of the printed consection, but was obtained in electronic form directly from WIPO at

                                                                                                                                                                                                                                                                                                                                                                                                                       용
                                                                                                                                                                                                                                                                                                             S
                                                                                                                                                                                                                                                                                                                                                                                                                                                                 The invention discloses a composition comprising two or more isolated rat or human polynucleotides or a polynucleotide which represents a fragment, derivative or allelic variation of the nucleic acid sequence. Also claimed are a vector comprising the novel polynucleotide, a host cell comprising the vector, a method for identifying a nucleotide sequence kit to perform the method, an array, a method for identifying an agent claim increases or decreases the expression of the polynucleotide sequence that is differentially expressed in neuronal tissue of a first animal compound that regulates the expression of the polynucleotide sequence the expression of a polynucleotide sequence compound that regulates the activity of one or more of the polynucleotide, a method for identifying a compound which regulates the compound that regulates the activity of one or more of the specification, a method for identifying a compound that regulates the activity in an animal of one or more of the polynucleotides, a method for identifying a compound useful in treating compound a pharmaceutical composition comprising the one or more of the specification, a method for identifying a compound useful in treating complypeptides or their antibodies. The polynucleotide or the compound that compound that sequence presented is a rat protein (shown in Table 2 of the specification) which is differentially expressed during pain. Note: The sequence data for this patent did not form part of the printed of the printed activity is abtained in electronic form directly from WIPO at the specification, which is a differentially expressed during pain. Note:
                                                                                                                                                                                                                                                                                                                                                   Matches

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                  psychiatric diseases, cardiovascular diseases, respiratory diseases, renal diseases, or gastrointestinal diseases. These may also be used to treat diseases, abnormalities and disorders caused by abnormal expression, production, function and/or metabolism of the genes, as vaccines for inducing immunological response in a mammal, and in screening methods for detecting the effect of added compounds on the production of mRNA and polypeptide in cells. The polypeptides can be used as immunogens to produce antibodies immunospecific for the polypeptides, and to identify membrane-bound or soluble receptors. The polymucleotides may be used as diagnostic reagents, in chromosome localisation studies, and in tissue expression studies. The present sequence represents the amino acid sequence of novel human secreted protein #18
                                                                 Cystatin-8; Zcys8; cancer; procoagulant protein; thrombosis; spermatogenesis; seminal fluid viscosity; cryopreserved sperm; sperm motility; fertilisation; antigenic peptide.
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           The invention relates to an isolated novel secreted polypeptide (I) and polypucleotide (II). (I) and (II) are useful for treating cancer, autolmmune diseases, wound healing disorder, infections, haematopoietic disorders, inflammatory disorders, infertility, neurological and
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                             New secreted proteins or polypeptides, useful for treating e.g. cancer, autoimmune diseases, wound healing disorder, infections, hematopoietic disorders, inflammatory disorders, infertility, cancer.

The invention des polypeptide (I). protein in an ind
                                      quantities of Zcys8 protein and DNA sequences that encode Zcys8 genes. The polynucleotide encoding (I) is useful to detect and to localise the expression of a Zcys8 gene in a biological sample and Zcys8 oligonucleotide probes are useful for in vivo diagnosis. The polynucleotide encoding (I) is useful in determining whether a subject's chromosomes contain a mutation in the Zcys8 gene like aneuploidy, gene copy number changes, insertions, deletions, restriction site changes and rearrangements and genetic alterations that inactivate the Zcys8 gene. This sequence represents an antigenic peptide of human cystatin-8 (Zcys8)
                                                                                                                                                                                                                                                of interaction between Zcys8 and its receptor. Zcys8 is useful in enhancing fertilisation during assisted reproduction in humans and in animals. Anti-(I) antibodies are useful to screen biological samples like blood, urine, saliva, tissue biopsy and autopsy material in vitro for the presence of Zcys8. The antibodies are also useful to isolate large

Sequence 3, Application US/09431480

Patent No. 6235708

GENERAL INFORMATION:

APPLICANT: Holloway, James L.

APPLICANT: Feldhaus, Andrew

ITILE OF INVENTION: TESTIS SPECIFIC CYSTATIN-LIKE PROTEIN CYSTATIN T

FILE REFERENCE: 98-72

CURRENT APPLICATION NUMBER: US/09/431,480

CURRENT FILING DATE: 1999-11-01

EARLIER APPLICATION NUMBER: 60/109,217

EARLIER APPLICATION NUMBER: 60/156,382

EARLIER APPLICATION NUMBER: 60/156,382

EARLIER FILING DATE: 1999-09-28

NUMBER OF SEQ ID NOS: 22

SOPTWARE FastSEQ for Windows Version 3.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ; LENGTH: 142

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                                                                                              Score

kininogen, HMW II precursor - bovine
N;Alternate names: alpha-2-thiol proteinase inhibitor; preprokininogen
N;Contains: bradykinin (kallidin); kininogen I; kininogen II; prokinin
                                                                                                                                                                                                                                                                                                                                                                                                 F;19/Modified site: pyrrolidone carboxylic acid (Gln) (in mature form) #status predicted F;27-406,82-93,106-125,141-144,205-217,228-247,263-266,327-339,350-369/Disulfide bonds: F;47,87,168,169,197,204/Binding site: carbohydrate (Asn) (covalent) #status predicted F;378-379/Cleavage site: Met-Lys (kallikrein) #status predicted F;388/Modified site: 4-hydroxyproline (Pro) #status predicted
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           A;Cross-references: GB:J00010; GB:V00426; NID:g163256; PIDN:AAA30604.1; PID:g163257 G;Comment: The LMW kininogen precursor is produced from the same gene as the HMW form a G;Comment: Kininogen is a cysteine proteinase inhibitor, takes part in initiation of th G;Comment: Bradykinin, released from kininogen by Kallikrein, is a potent vasodilator, xyproline residue is present in the kininogen prior to the release of bradykinin.
